

Gas system compliance

Obligations for owners of gas systems

May 2012

Getting gas work done in your home or business?

Owners of gas systems are reminded that they should obtain a compliance certificate from a licensed gasfitter for all gas work installations and modifications on their gas system. The gasfitter is obliged to give the owner the certificate immediately after the installation is completed, and provide a copy to the gas supplier within five business days. The owner is well advised to keep a copy of the certificate on their premises for their own records..

Why is keeping the certificate important?

The certificate is a legal document demonstrating that the gasfitter has complied with safety standards. Retaining this certificate will allow both the owner and Petroleum and Gas Inspectors to identify the gasfitter if noncompliant work is found. If the gasfitter cannot be identified, the owner of the installation can be liable for the cost of any rectification, if required. An incident caused by a noncompliant gas system may also affect insurance cover. Gas suppliers may refuse to supply gas if they do not receive their copy of the certificate. The certificate looks like this:

In addition, a **compliance plate** must be affixed to all new installations and modifications completed after 1 July 2011. The compliance plate looks like this:

Gas system compliance plate
Petroleum and Gas (Production and Safety) Regulation 2004 s. 91B (3)

Petroleum and Gas Inspectorate
Form no. PGR91B3 version 1

Queensland Government
Gas System Compliance Certificate
Section 734 (3) Petroleum and Gas (Production and Safety) Act 2004

Owner operator Please print clearly and use BLOCK LETTERS

Name of owner/operator of gas system _____
Address _____
Phone number _____ Location of gas system (if mobile e.g. caravan include rego no. or VIN No.) _____

Details of gas system installed and installation work done: If insufficient space attach list

Gas device type: Type A Type B (provide details)
Gas type: Natural gas LPG Other _____
Gas supplier (if known): _____

Appliance type (modify as required)	Make/model (e.g. Rheem 871024)	Gas Device Approval number (e.g. NGA1234 or Type B Certificate 00123)
Cooker:		
Water heater:		
Other:		
Other:		

Actual operating pressure (provide details including individual pressures on multi-stage systems) _____ Test point installed: Yes No Pressure test completed: Yes No

Gas work (detail gas work undertaken) _____ Sketch (if desired provide brief sketch of work undertaken including layout of device and pipework) _____

Licensed/authorised installer

I hereby certify that the gas system listed above, as installed, is fully compliant with the safety requirements and other relevant provisions of the Petroleum and Gas (Production and Safety) Act 2004 and Regulation 2004.

Name of licensed/authorised person _____ Please print clearly Licence/authorisation no. _____ Phone number _____
Address of licensed/authorised person _____
Signature _____ Date _____

Notes: not to be used for a gas system that supplies fuel to engines in vehicles or vessels

Your obligations in a nutshell

As the owner of a gas system, you must take all reasonable steps to ensure that the system complies with safety requirements. You can do this by:

- having your gas appliances serviced regularly
- making sure all gas work is done by a licensed gasfitter
- ensuring the gas installer affixes a gas system compliance plate for the installation
- obtaining a copy of the gas certificate and keeping it on your premises.

The Petroleum and Gas Inspectorate can be contacted on the following email address gassafe@deedi.qld.gov.au or visit our website mines.industry.qld.gov.au
